SKILLS

Ruby on Rails React Redux Java JavaScript HTML CSS Git Rspec Matlab

PROJECTS

MathPath - Full stack web application built with Ruby on Rails, React, and Redux

<https://github.com/cfritsch5/MathPath>, <http://www.mathpath.rocks>

- Implemented React components to dynamically display content and manage dynamic front end data with Redux
- Utilized PostgreSQL relational database to manage user, curriculum, and progress data

Shelffaux - Interactive website built with JavaScript and HTML

<https://github.com/cfritsch5/shelffaux>, <http://www.shelffaux.pro>

- Created custom 3d animation for viewing books in perspective using JavaScript & HTML canvas
- Developed an algorithm to resample images and transform the image into perspective
- Built responsive animations for books to dynamically respond to mouse movement
- Implemented Bubble Sort to achieve special effects while sorting

EDUCATION

App Academy - Software Engineering Course

August 2017

- 1000 hours of programming experience
- Highly selective program accepts <3% of applicants

Illinois Institute of Technology - B.S Mechanical Engineering

May 2015

- Highlighted Courses - Java 1 & 2, Computer Science for Engineers

EXPERIENCE

City Year - Americorps Volunteer

July 2015 - June 2016

- Mentored at risk students, taught four daily Algebra support lessons, and lead community garden beautification project

Illinois Institute of Technology - Resident Advisor

May 2015

- Proposed, planned, and implemented monthly community development programming, and safe space programming for 150 residents and 70 staff members

- Initiated the partnership between the ongoing Human Library Chicago, and led the student team running the founding event

Illinois Institute of Technology — Teaching Assistant - Computer Science for Engineers

January 2014 - June 2014

- Led weekly lab sessions and bi-weekly tutoring sessions on the Matlab language and core computer science concepts
